

stepahead[®]

Tech

Stepahead Tech is a carbon composite foot orthotic with EVA posts. It is an ideal model where the specific properties of this material are indicated. It has an excellent strength to thickness ratio and is often used where a more shock absorbing orthotic is indicated.

Image for illustration purposes only.

When to specify?

Where the specific properties of carbon fibre composite materials are required such as low weight and bulk.

When treating?

- Most foot conditions and pathologies

In which shoes?
